# The Parent Toolkit

from your friends at PPWNM!

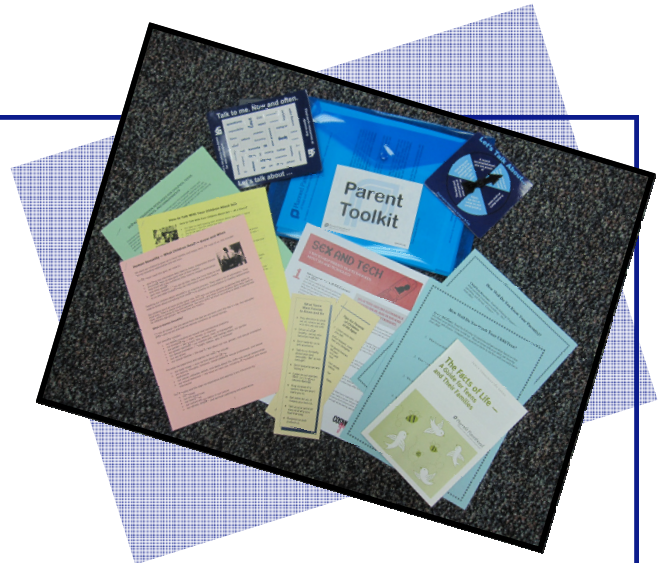

The **Parent Toolkit** was created to help parents teach their children about growth and development, sexuality-related issues, communication, and relationships.

The kit is filled with expert advice on:

- How to talk to your children about sex
- What children need to know about human sexuality and when
- Sex and technology
- What teens want parents to know and do, and more!

There are also games in the kit that encourage parent/child communication in a fun way.

The resources in this kit can help parents/guardians brush up on their knowledge about sexuality, improve communication with their children or teens, increase both parties' comfort level with sexuality issues, and prepare parents to deal with sensitive questions.

**The Parent Toolkit is available exclusively through PPWNM for just \$5!**
